A versatile mid-tone warm grey/beige without a pink undertone. Dark enough not to look washed out in rooms without a lot of natural light but light enough to work in smaller spaces too.

1.

Use block out curtains for privacy and to minimize light pollution for a better night's sleep

Rugs are a great way to add pattern, texture and softness to a space. I love Ruggable because the top layer of the rug can be removed and machine washed - perfect for keeping the bedroom dust free if you have allergies.

6.

Layer your lighting for a cozy space. Use a mixture of overhead lights, table lamps and floor lamps.

7.

Brighten up a small space by using a large mirror to reflect natural light back into the room. Place opposite a window or another light source!
