

Benjamin Moore Gray Cashmere Bedroom Mood Board Featuring Anthropologie Decor

Benjamin Moore Gray Cashmere
A soft smokey green gray with a slight blue hint

Benjamin Moore Steam AF-15
A very versatile soft white with a slight hint of cream and a touch of gray for softness.

Benjamin Moore Light Mocha 2096-60
A warm beige with a slight blush undertone.

Layer your lighting for a cozy space. Use a mixture of overhead lights, floor lamps and table lamps to create a relaxing bedroom.

High quality bedding may be pricey but it will stand up better to frequent washing and only get softer with time.

Rugs are a great way to add softness to a bedroom. I love Ruggable since they can be machine washed - perfect for light designs like this one!

Brighten up a small space by using a large mirror to reflect natural light back into the room. Place opposite a window or another light source!
